Subject: Regarding Request for Testing Results Data of RIX-ORG-24 Project.

Dear <Colleague's First Name>,

I am writing this mail to **kindly request you for certain data on RIX-ORG-24 Project's recent Testing and Analysis Results**. The reason for the said request is that I have an **important report to complete**, and I need the said data **to complete the report on time**.

The report has to cover the progress made in our project over the last few months and I am **missing a few key details** with respect to our testing and analysis procedure that was carried out a few weeks ago. And, since you personally handled majority of the testing process, I strongly believe that I could get the necessary data from you.

I would like to kindly request for the **Reports on Use-Case Testing and Quality Analysis**. I will be looking forward for your reply.

Best Regards,
