Create a virtual machine

Help me choose the right VM size for my workload Help me create a VM optimized for high availability Help me create a low cost VM

Authentication type

☒ SSH public key
☐ Password

Azure now automatically generates an SSH key pair for you and allows you to store it for future use. It is a fast, simple, and secure way to connect to your virtual machine.

Username *

azureuser

SSH public key source

Generate new key pair

SSH Key Type

☒ RSA SSH Format
☐ Ed25519 SSH Format

Ed25519 provides a fixed security level of no more than 128 bits for 256-bit key, while RSA could offer better security with keys longer than 3072 bits.

Key pair name *

UbuntuKey

Inbound port rules

Select which virtual machine network ports are accessible from the public internet. You can specify more limited or granular network access on the Networking tab.

Public inbound ports *

☐ None
☒ Allow selected ports

< Previous Next: Disks > Review + create

Generate new key pair

An SSH key pair contains both a public key and a private key. Azure doesn't store the private key. After the SSH key resource is created, you won't be able to download the private key again. [Learn more](#)

Download private key and create resource

Return to create a virtual machine

Connect your terminal via Bastion:

After connecting to the terminal:

`sudo apt update && sudo apt upgrade -y`

`sudo apt install xrdp`

`sudo usermod -aG ssl-cert xrdp`

`sudo systemctl restart xrdp`

`sudo systemctl status xrdp:`

```

azureuser@UbuntuVM:~$ sudo systemctl status xrdp
● xrdp.service - xrdp daemon
   Loaded: loaded (/usr/lib/systemd/system/xrdp.service; enabled; preset: enabled)
   Active: active (running) since Sat 2025-08-30 07:20:35 UTC; 14s ago
     Docs: man:xrdp(8)
           man:xrdp.ini(5)
   Process: 6161 ExecStartPre=bin/sh /usr/share/xrdp/socksetup (code=exited, status=0/SUCCESS)

Win + R:

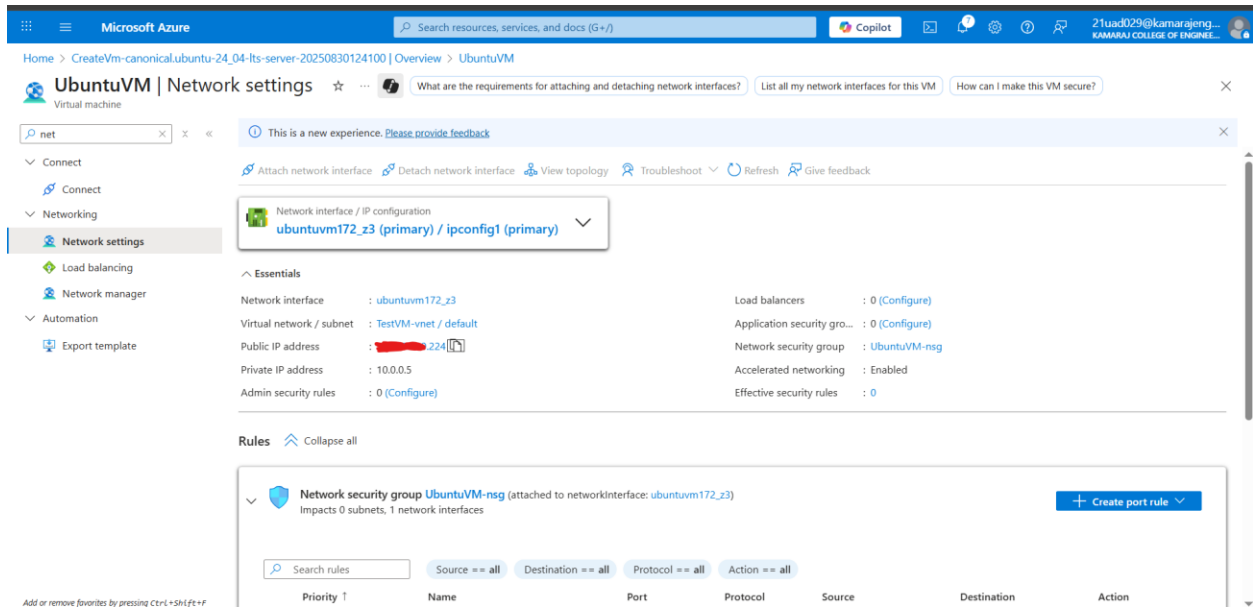

Run

Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.

Open:

OK Cancel Browse...

Copy the ip from the VM:

Then in the ubuntu terminal set the password:

Sudo passwd <username>:

```
azureuser@UbuntuVM:~$ sudo passwd azureuser
New password:
Retype new password:
passwd: password updated successfully
azureuser@UbuntuVM:~$
```

This will only give the Terminal as the RDP connection

Inorder to have the GUI we need to enable the XFCE:

```
sudo apt update
```

```
sudo apt install xfce4 xfce4-goodies -y
```

And we need to mention the xRDP to start with the XFCE:

```
echo "startxfce4" > ~/.xsession
```

```
chmod +x ~/.xsession
```

And restart the xRDP:

```
sudo systemctl restart xrdp
```

Then connect with the Ip in the mstsc:
